PROFILE

AI researcher with a background in artificial intelligence, pattern recognition, computer vision, and applied machine learning. Experienced in coordinating research projects and translating technical work into clear, measurable outcomes. I have contributed to 13 research projects at the Technical University of Cluj-Napoca and published 5 peer-reviewed papers as first author in areas including precision agriculture, cryptocurrency forecasting, multispectral weed mapping, and smart city semantic segmentation.

PROFESSIONAL EXPERIENCE

Technical University of Cluj-Napoca

Researcher

2021 - Present
Baia Mare, Romania

- Led and coordinated multiple AI research projects from concept to completion, ensuring alignment between objectives, timelines, and deliverables.
- Defined project scope and measurable success criteria, including macro/micro F1 score and Hamming loss, to track progress and validate outcomes.
- Published 5 peer-reviewed papers as first author, managing the full project lifecycle from planning and team coordination to analysis and delivery.
- Achieved 99.46% Micro-F1 and 98.56% accuracy with a Transformer-based model ensemble, demonstrating measurable improvement over prior baselines.
- Structured workflows and communicated results through reports, international conference presentations, and peer-reviewed research outputs.

Teaching Assistant

2025 - 2026
Baia Mare, Romania

- Designed and delivered hands-on laboratory activities aligned with current industry practices, enhancing student engagement and applied understanding.
- Transformed theoretical lessons into applied troubleshooting scenarios, using structured feedback loops and iterative improvement.
- Mentored students through technical mini-projects, guiding them in defining scope, setting milestones, and delivering functional network configurations on schedule.

EDUCATION

Technical University of Cluj-Napoca

- PhD in Electronic Engineering, Telecommunications, and Information Technologies 2024 - Present
- Master's in Computer Science and Software Engineering 2021 - 2023
- Bachelor's in Computer Science 2018 - 2021

SKILLS

Product and Project Management: Requirements definition | Feature prioritization | Stakeholder communication

Methods: Agile / Scrum | Sprint planning | Iterative delivery

Technical Literacy: Python (PyTorch, TensorFlow) | Data analysis and metrics | Model validation and experimentation

Languages: English (C2) | Romanian (Native)
