PROFILE

Professional with a background in Artificial Intelligence and Pattern Recognition, experienced in coordinating complex projects and delivering results in collaborative environments. Contributed to 11 research projects in partnership with faculty members from the Technical University of Cluj-Napoca and led the development of three first-author published research projects from concept to final delivery. Strong in planning, cross-team collaboration, execution, and translating technical work into clear outcomes.

PROFESSIONAL EXPERIENCE

Technical University of Cluj Napoca

Researcher

2021 – Present

Baia Mare, Romania

- **Led and coordinated** multiple AI research projects from concept to completion, ensuring alignment between objectives, timelines, and deliverables.
- **Defined project scope** and measurable success criteria (Macro/Micro F1, Hamming Loss) to track progress and validate outcomes.
- Served as **first author** on three peer-reviewed publications, managing the full project lifecycle from planning and team coordination to analysis and delivery.
- Achieved **99.46% Micro-F1 (98.56% accuracy)** with a Transformer-based model ensemble, demonstrating measurable improvement over prior baselines.
- **Structured workflows and communicated results** through reports and international conference presentations (10+ peer-reviewed works).

Teaching Assistant

2025 – 2026

Baia Mare, Romania

- **Designed and delivered** hands-on lab activities aligned with current industry practices, enhancing student engagement and applied understanding.
- **Transformed theoretical lessons** into real troubleshooting scenarios, implementing structured feedback loops using agile iteration principles to create structured feedback and continuous improvement.
- **Introduced skills-based evaluation** methods and clear success criteria, leading to measurable improvements in student performance.
- **Mentored students through technical mini-projects**, guiding them in defining scope, setting milestones, and delivering functional network configurations on schedule.

EDUCATION

Technical University of Cluj Napoca

2024 – Present

- Doctor of Philosophy - PhD in Electronic Engineering, Telecommunications, and Information Technologies
- Master's in Computer Science and Software Engineering
- Bachelor's in Computer Science

2021 – 2023

2018 – 2021

SKILLS

Product and Project Management: Requirements definition | Feature prioritization | Stakeholder communication

Methods: Agile / Scrum | Sprint planning | Iterative delivery

Technical Literacy: Python (PyTorch, TensorFlow) | Data analysis & metrics | Model validation and experimentation

Languages: English (C2) | Romanian (Native)
